2025

Welcome to the QS World University Rankings by Subject 2025

This file provides the results for your institution in the broad subject area and narrow subjects where you have been nominated for evaluation in our academic reputation survey, as well as the scores and ranks for those subjects where you scored highly enough to be ranked. It should also provide you with useful information for any media communication you might need to prepare before launch.

To produce the rankings for this year the team analysed the reputation and research output of over 5,200 institutions. From this group, 1,747 were ranked across 55 narrow subjects and 5 broad subject areas, creating over 21,000 entries. These figures reflect some of the scale behind this huge undertaking that the team carries out in order to produce these subject rankings.

Page 3 shows a summary of your scores in broad subject areas you have been analysed in, as well as ranks in the broad subject areas you are to be published in. Page 6 presents a summary of your institution's scores and ranks in narrow subjects.

In the Appendix (page 13) you will find an explanation of the weightings that make up the different subject tables, the evolution of the subject rankings exercise, the paper thresholds that we have used in this edition and an indication of the number of institutions analysed and ranked.

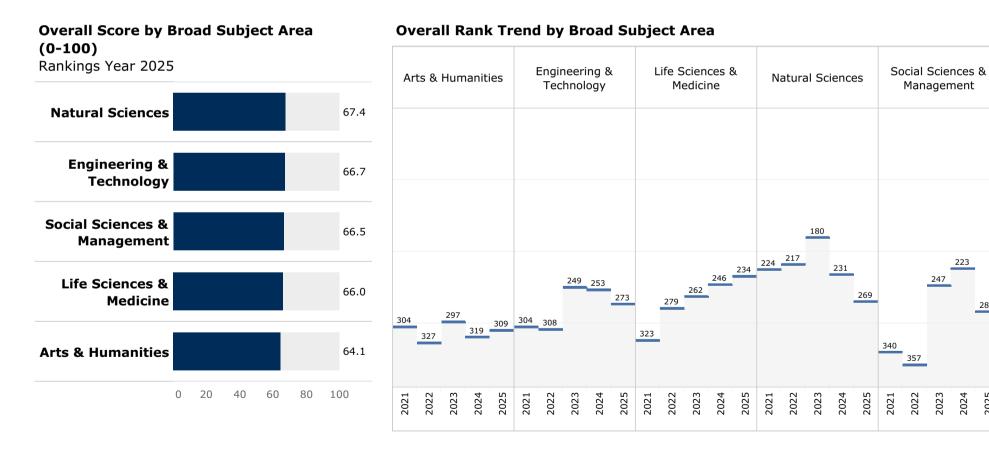

We hope you will find this useful.

Rankings Team, QS Institutional Performance Unit

Broad Subject Areas - Overall Ranks and Scores by Indicator

UNESP

This page displays your institution's comprehensive performance by indicator for all broad subject areas where it meets the ranking criteria. Consult the methodology section for details on the minimum requirements for inclusion in the rankings.

If you have a displayed score in reputation and research indicators then you met the minimum reputation and research threshold for consideration. In this case, the only reason you are not ranked is that your score is not high enough to receive a published rank.

Bow is your institution performing in key subject areas?

Partner with QS Analytics: Subject Rankings and uncover the insights you need to excel.

Narrow Subjects - Overall Rank and Scores by Indicator

If you have a displayed score in reputation and research indicators, then you have met the minimum threshold for consideration in these categories. If you are not ranked, it is because your score is not high enough to qualify for a published rank.

Receiving a score for a particular subject does not guarantee that we have checked for its presence at your institution. These checks are only carried out for institutions with a score high enough to receive a published rank in the subject. However, we encourage institutions to inform us about their subject coverage proactively: https://gs-hub2.qs.com/#

Methodology - Indicator Definitions

The OS World University Rankings by Subject utilise a set of indicators with variable weights. It's important to note that not every indicator is used across all subjects, depending on the relevance of the available data.

Citations per Paper

Academic Reputation

by QS in 2004, this key metric

draws on the insights of

institutions that exemplify

academic excellence. Their

research quality, strategic

influence of these universities.

Employer Reputation

The Academic Reputation Index, The Employer Reputation central to the QS World University metric stands out in global Rankings® and pivotal in the QS assessments by uniquely Subject Rankings, assesses global emphasizing employability —an university performance. Launched aspect often overlooked by other major rankings. As the sole ranking to prioritize this international academics to identify critical facet of higher education, we recognize that for most undergraduates, the collective expertise sheds light on university's standing among employers is a decisive factor partnerships, innovation, and the in their post-graduation broader educational and societal success.

citation counts to maintain equitable outcomes.

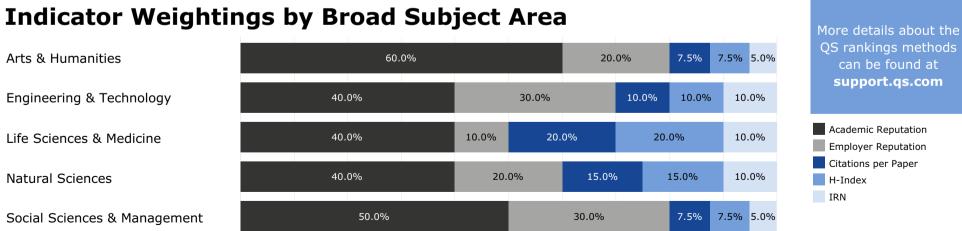

The Citations per Paper metric reflects the research impact and quality of institutions, based on a five-vear publication most-cited works and the and six-vear citation window. For Subject Rankings, citations from specialized journals are doubly weighted, while institutions with fewer publications face adjusted

The h-index quantifies a researcher's scholarly output and influence by tallying their corresponding citation count. This index can extend to collective bodies like departments, institutions—our indicator's focus-or even entire countries and academic journals.

H-Index

International Research Network (IRN)

The International Research Network (IRN) assesses an institution's global engagement by tracking its international research partnerships and resulting co-authored publications. Leveraging the Margalef Index, widely used in the Environemental Sciences, the IRN reflects the diversity and scope of an institution's research connections and the effectiveness of establishing these global networks.

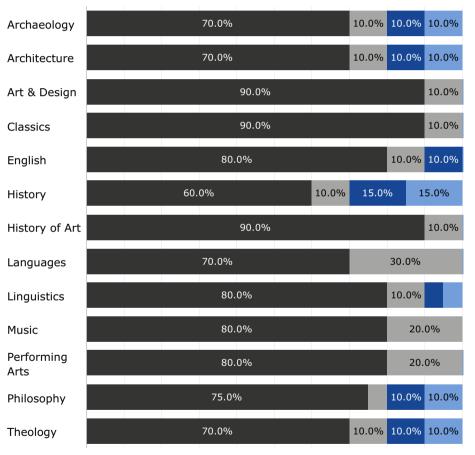

Indicator Weightings by Narrow Subject

QS uses a variable approach to the weightings for the different subjects. The chart below provides details of the combinations used in the 2025 edition of the rankings.

Evolution in Published Subjects

The **QS World University Rankings by Subject** ranks the world's top universities in individual subject areas, covering 55 disciplines as of 2025. A list of the considered subjects, grouped by the year of first release, is presented below.

The chart below shows the evolution in the total number of published narrow subjects.

Published Institutions by Location

QS World University Rankings by Subject 2025 Fact File | UNESP

Top Locations by number of ranked institutions

United States of America	220
China (Mainland)	124
United Kingdom	104
France	81
India	79
Germany	61
Italy	56
Japan	53
Russian Federation	47
Republic of Korea	47

Minimum Research Activity Required

In order to feature in any discipline table, an institution must meet three simple prerequisites:

- Offer undergraduate or taught postgraduate programmes in the given discipline
- Exceed the minimum required score for the academic and/or employer reputation indicators
- Exceed the five-year threshold for number of papers published and indexed by Scopus in the given discipline

The following chart discloses the minimum number of papers required to be considered in the latest edition of the rankings by subject.

190 170 140 140 80 80 80 80 80 80 80 6 40 40 40 40 40 30 30 30 30 30 30 30 8 30 20 20 20 20 20 2 10 0 0 0 Music Theology Medicine Biology Computer Science Physics Electrical Engineering Materials Science Agriculture Mechanical Engineering Chemical Engineering Earth Sciences Environmental Sciences Geophysics Mathematics Civil Engineering Nursing Petroleum Engineering History Politics English La∨ Sport Art & Design Classics History of Art Performing Arts Chemistry Geology Pharmacy Psychology Data Science Mining Engineering Statistics Anatomy Architecture Business Economics Education Geography Veterinary Science Accounting & Finance Communication Library Management Marketing Linguistics Philosophy Hospitality Languages Social Policy Dentistry Sociology Anthropology Archaeology Development Studies
